

Make wire slightly longer than desired height of tree

Double back wire a little less than halfway

3

Bend

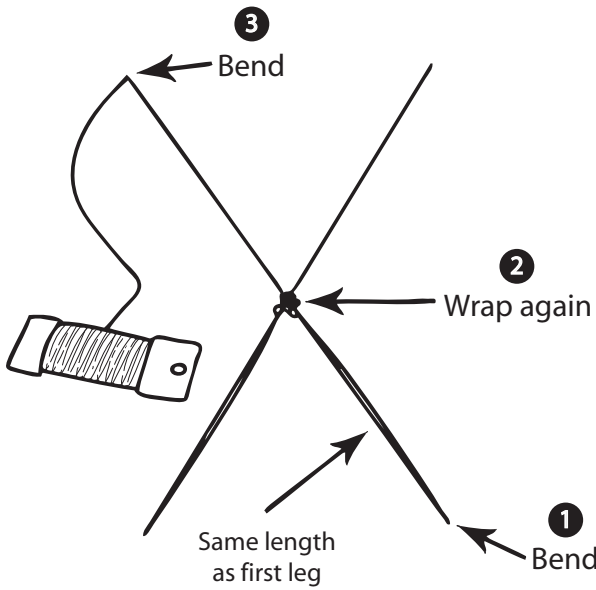

2

Wrap again

1

Bend

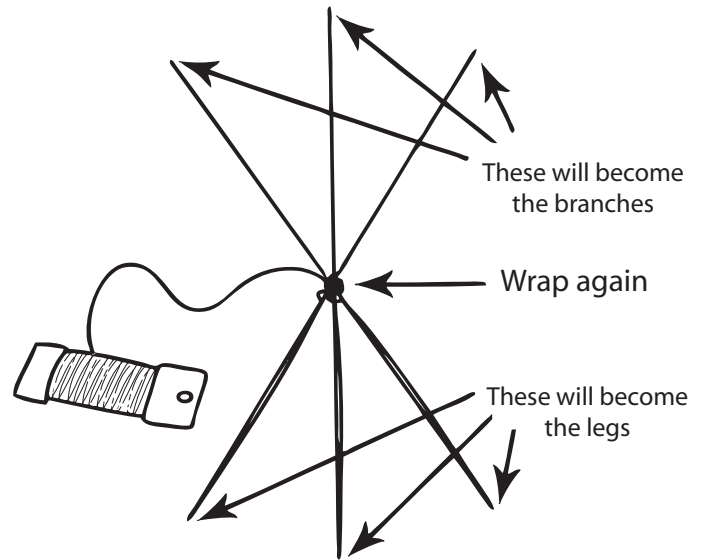

Same length as first leg

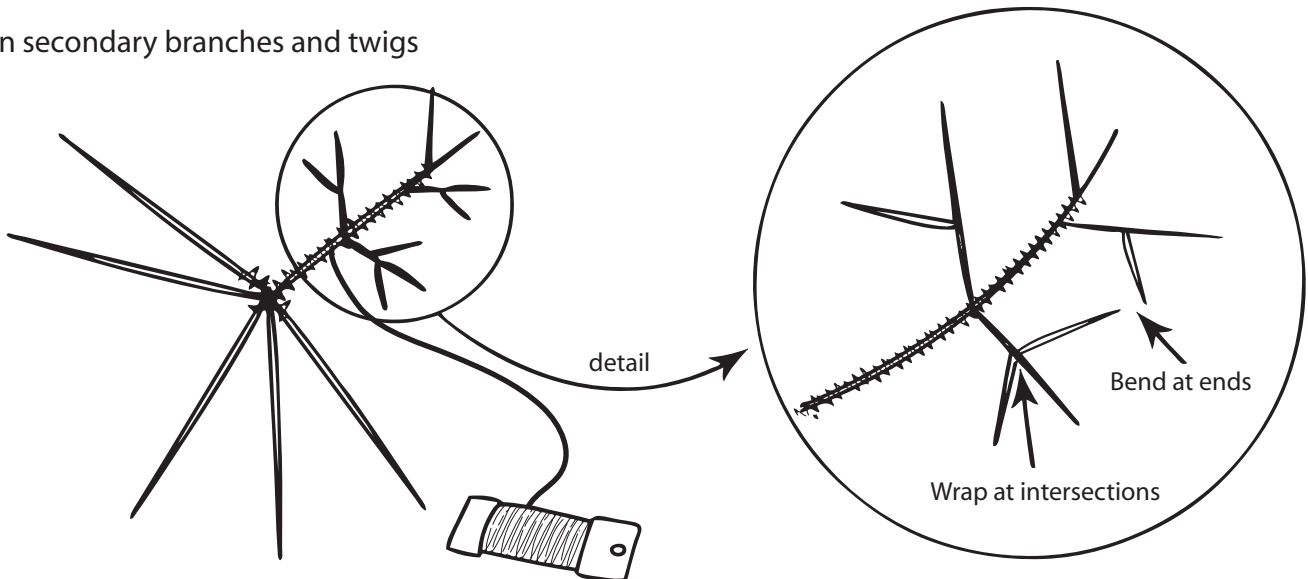

These will become the branches

Wrap again

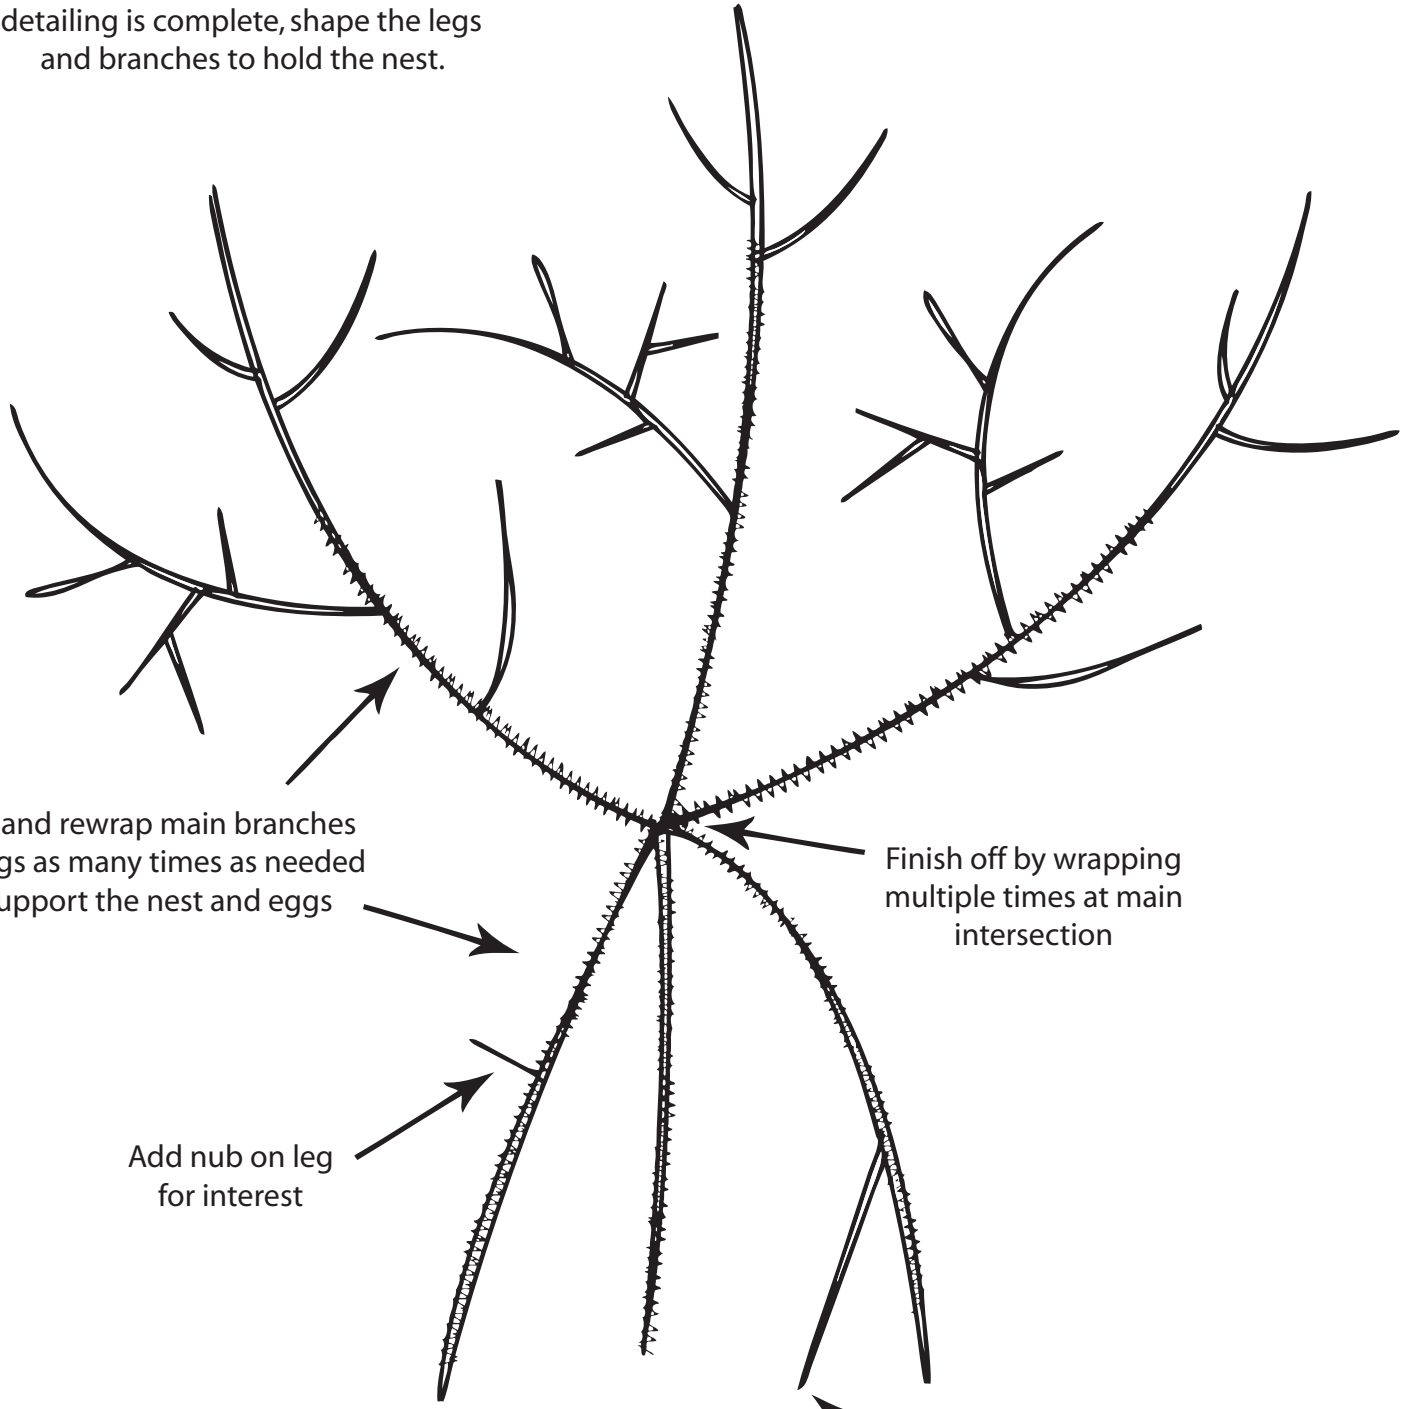

These will become the legs

Begin secondary branches and twigs

Continue making branches until the desired number is achieved. Once all the detailing is complete, shape the legs and branches to hold the nest.

Wrap and rewrap main branches and legs as many times as needed to support the nest and eggs

Finish off by wrapping multiple times at main intersection

Add nub on leg for interest

Add extra leg for interest
